* The large research infrastructures approved by the Government of the Czech Republic for public funding in **2016-2022** are requested to fill in **50 top-class R&D and innovation results** reached by their user community in the open access regime in 2016-2020. The large research infrastructures approved by the Government of the Czech Republic for public funding in **2019-2022** are requested to fill in **20 top-class R&D and innovation results** reached by their user community in the open access regime in 2019-2020. In this case delete the unnecessary lines pre-determined in the table.

** **Excellent Science = Publication results:** peer-reviewed scientific article; book; chapter in a book; paper in proceedings. **Application = Non-publication results:** patent; pilot plant; verified technology; variety; breed; utility model; industrial design; prototype; functioning sample; results projected into legislation and standards; results projected into guidelines and other non-legislative regulations; results projected into approved strategic and/or policy documents by state or by public administration bodies; methodology; medical procedure; conservation procedure; specialised map; software; specialised public database; research report; summary research report; audio-visual work; holding an exhibition; holding an exhibition with a critical catalogue; holding a conference; holding a workshop; other results.

*** Add a reference to **website link**, where the result is downloadable if the result is open-accessible and/or insert any other remark you consider appropriate.
